HENLEY
STOVES

EST. 1985

Henley Stoves is Ireland's fastest growing stove brand.

All our stoves are designed and manufactured with efficiency in mind and they can boast efficiencies of up to 79%.

The Island Collection is a 6kW to 21kW collection of 3 multi-fuel stoves, and 2 insert stoves. All the stoves are available in an enamel or cast Iron finish. The two largest stoves are also available in boiler models.

The River Collection of multi-fuel stoves is a collection of 6 traditional stoves from 6kW to 16kW. Available in cast iron, the River Collection also features boiler stoves on most models.

View us online at **www.henleystoves.com**

Henley Stoves are based in County Kerry and have been making stoves for over a quarter of a century. Our experienced research and design team use the latest in technology to create super efficient stoves, certified to European CE standards and specifically tailored for the Irish market. Each stove is hand built and tested for efficiency and emissions and subjected to continuous refinements until it is as close to perfect as can be. Only then is it sent to production. The story doesn't end here. Each hand assembled stove is continually checked for quality on every step of production. Finally, before packaging every one of our stoves undergoes our rigorous 32 point quality check. Only when a stove has passed this stage is it fit to carry the "**Henley**" name.

All **Henley Stoves** come with a 5 year warranty, are CE EN13240 approved and use the latest airwash, cleanburn and convection technologies.

The Druid 5

Why a Henley Stove?

CLEANBURN

Cleanburn Technology

All our stoves use an advanced method of burning, incorporating a secondary airflow ensuring that the fuel is burnt to its full capacity, meaning much higher efficiencies for our stoves and a much lower impact on the environment.

AIRWASH

Airwash Technology

All our stoves are equipped with Airwash technology which allows a flow of air to run by the window of all our stoves, keeping the glass clean ensuring a perfect view of the fire within.

CONVECTION
TECHNOLOGY

Convection Technology

Henley Stoves have been designed with a vented airflow chamber between the outer skin and the stove body. This allows cold air to be pulled in at the bottom of the stove, and warm air to be delivered to the room at the top.

Henley 5 Year Warranty

All stoves in the Henley range come with a 5 year warranty as standard!

PLEASE NOTE: You need to download the Warranty Registration form from www.henleystoves.com, fill in the details and send to Henley Stoves, Curraheen, Tralee, Co. Kerry, Ireland to avail of our 5 year warranty.

EN13240
Approved

EN13229
Approved

CE EN13240 and EN13229 Approved

Our stoves are CE EN13240 and EN13229 approved which is a European Standard for heating appliances. This ensures that your stove has been approved and is safe for home use by the European Union.

Online Videos

We have a range of videos online at www.henleystoves.com which show our stoves in use.
